AGENDA ITEM: 11.16
SUBJECT: AMEND POOL CAPITAL PROJECT

The Budget/Finance Committee meeting held on July 20, 2013 recommended to the Board of Directors to amend the Pool Capital Project to allow for annual payments over a five year basis (2014 through 2018 with annual payments due April 30) instead of the three year schedule (2014 through 2016) originally approved. This recommendation is a result of communications with our bank representatives who have indicated a willingness to extend the Pool Capital Project financing period to five years with an agreement to include in the package a second capital project for an irrigation system for the golf course. Payments for both projects will be amortized over the five-year period. For the Irrigation System Capital Project, payments will start April 30 in the first year with our down payment and the remaining financed amount amortized over the following four years. Payments on the Irrigation System Capital Project will be concurrent with the Pool Capital Project payments. These changes are considered appropriate given that we are required to maintain a minimum balance of \$1 million in liquid funds during the term of the loan. The total annual payments will be less than the originally agreed amount of annual payments for the Pool Capital Project in each of three years. Depending on the final agreed contractual interest rate, the incremental interest cost of financing the two projects in this manner, (as opposed to the original three year amortization for the pool only), is estimated to be in the range of \$95M to \$100M.
